This is not business plan - I am looking for IT guy

During the year 2009 and 2010 I am going to build several eshops mainly in the Czech Republic, than in Poland, Germany and Slovakia. I am able to get significant storage capacities in these countries. I am looking for the guy, who is able to build several of these shops, without any question about graphics and other things - just do that!

Contact me, if you are able to build it
